

# 2015-16 SHELBY GT

What happens when you take the 2015 Ford Mustang GT, one of Car&Driver's 10 Best Cars and send it to Shelby for a proper aesthetic and performance enhancement? You get the most capable and versatile Mustang GT in the shape of the 2015 Shelby GT - available in Manual or Automatic Transmission.

We started by infusing a more aggressive style with loads of carbon fiber goodness: hood, rockers, spoiler and diffuser. Only the Air Force spy planes use more carbon fiber. And it comes with all of the special Shelby badging one expects including the striping and a cold air intake for greater power. Plus there's a new set of dance shoes, custom 20" WELD Racing wheels with super-sticky Michelin rubber. All of this starts at \$23,995, but if MORE is more in your book, you'll want to read on.

A long list of options start with a 670HP Ford Performance supercharger, continue with upgraded suspension, Wilwood brakes, and adjustable rear control arms. Not to mention, the dash-mounted, 3-gauge pod to track boost, fuel and oil pressure, as well as race seats, roll cage and harness.

2015-16 Shelby GT: Starting at \$23,995 (Does not include base vehicle, Shelby retains all take-off parts.)

### Standard Features

#### Exteriors:
